

SOLUTIONS FOR COMMERCIAL BUSINESSES

BUILD ANYWHERE WITHOUT SACRIFICES

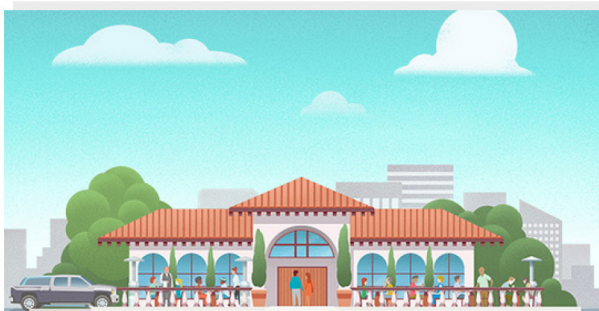

For commercial construction pros, business owners and schools, there's no simpler way to describe the promise of propane. It allows you to construct your buildings and run your business with first-rate equipment and services regardless of where they are located.

Propane is a smart, efficient and environmentally-friendly choice for commercial business applications, and it's an abundant, domestically produced source of energy.

PROPANE APPLICATIONS

The efficiency, reliability, and versatility of clean, American-made propane makes it an outstanding choice for commercial applications. Commercial business professionals have many environmentally friendly, high performance propane equipment solutions for achieving their design and service goals cost-effectively.

COOKING EQUIPMENT

Propane cooking equipment delivers professional-grade performance while decreasing fuel consumption and providing convenience and functionality in any commercial kitchen. Featuring greater temperature control, instant-on burners, greater capacity levels, even heat distribution, and design flexibility, it's easy to see why professional chefs and designers prefer gas ranges, cook tops, and ovens over electric models. Consider using Energy Star kitchen equipment to help reduce the energy costs for establishments and add directly to the bottom line.

GENERATORS

Commercial propane generators provide supplemental power for a building's electrical loads when the electric grid is interrupted. They are typically installed as fully automated systems that ramp up quickly for almost immediate power and hands-off operation. Propane-powered standby generators offer clear advantages when considering fuel storage, maintenance, and reliability. The indefinite shelf life of propane makes it an ideal fuel. Contact us to find out how we can keep you up and running during a storm or extended outage.

FORKLIFTS

For decades, business owners have counted on propane forklifts to get the job done the first time — all while keeping costs in check. Propane cylinders last three times longer than electric batteries, and their lifespan isn't affected by the amount of fuel left in the tank. Propane forklifts also provide 100 percent power throughout operation to make the most of the work day, and one cylinder covers an entire eight-hour shift. Businesses that operate 24/7 can count on propane forklifts over multiple shifts and cylinders can last up to 30 years with re-qualified use.

WATER HEATERS

Propane tankless water heaters offer an innovative, high performance water heating solution for commercial applications. They are effective in both new commercial projects and as replacements for existing storage tank systems. Tankless water heaters are compact, energy efficient (up to 98 percent), and deliver endless, on-demand hot water. And with a life-cycle as long as 20 years, they provide tremendous value for commercial applications.

WITH DOZENS OF APPLICATIONS WE HAVE YOUR SOLUTION!

Berkeley Propane

A Subsidiary of Berkeley Electric Cooperative

At Berkeley Propane, we understand you need reliable service to operate your business efficiently. Since we opened our doors in 1999, our commitment has been to provide competitive prices and unparalleled service to both residential and commercial customers.

UNLIKE ANY OTHER ENERGY SOURCE

No matter how you're using it, propane meets your needs with unique advantages other energy sources cannot deliver.

AFFORDABLE

Propane will save you money, thanks to its generally lower cost and efficient performance that reduces energy bills.

CLEANER

Propane helps you live and work more sustainably by minimizing your carbon footprint.

RELIABLE

Because it's stored on-site or delivered by your local supplier, propane is always there when you need it.

We are dedicated to providing exceptional energy and service while maintaining the highest level of commitment to safety and reliability.

Business hours

Monday thru Friday, 8:00 AM to 5:00 PM
(Our call center is available 24/7 if you need to speak to someone)

Office locations

100 Hwy 52 S., Moncks Corner, SC 29461
3351 Main Rd., Johns Island, SC 29455
(You can also contact us through any Berkeley Electric Cooperative district office)
